

SECURE CONTAINERS IN THE BEST POSSIBLE WAY

Tyres, complete wheels, pyrotechnic products, tools and machinery are high-value goods that are stored in containers and require good security. The ConHasp GRANIT™ 215 is the first choice when it comes to protecting high-value items.

The ConHasp hasp is made of resistant steel and is manufactured using a special welding process. All parts are corrosion protected. Fastening the container lock to the container with two solid bolts creates a particularly robust connection. Container lock + padlock In combination with a padlock, the containers can be securely locked. There are different variants of the product, depending on requirements: The ConHasp GRANIT™ 215 is available both without a padlock and in combination with a suitable padlock. The padlock is available keyed alike or keyed to differ, with or without cylinder, depending on the variant. If the hasp is combined with the Rock 83/60HB100-5 padlock, it is possible to install a Europrofile half cylinder yourself and integrate the container lock into existing locking systems. Tested and recognised

In combination with padlocks 37/55HB100 and 37RK/70HB100, the hasp is recognised in the highest class B in accordance with VdS guideline 3503. The approval also applies to the set comprising container lock and padlock 83/60HB100-5, but only in conjunction with a VdS Home class profile cylinder. Our recommendation: the VdS A-certified Bravus 2000, 2500, 3000, 3500 or 4000 profile cylinders.

This means that the above combinations of hasp and padlock offer additional protection against attacks on the container. If, for example, the container bars are cut, the container lock remains securely in position and cannot simply be removed.

We recommend using the hasp together with a GRANIT™ or Rock padlock listed in the variants to achieve the best possible security.

Technologies

- Additional securing of goods in containers

- Locking of the two-part construction with padlock 37RK/70HB100, 37/55HB100, 83/60HB100-5 or 83/80HB100
- Extremely resistant steel
- Processed using a special welding process for even greater security
- All parts protected against corrosion by special coating
- 37/55 and 37RK/70: with ABUS Plus cylinder and code card
- 83/60HB100-5 and 83/80HB100: without cylinder
- VdS 3503 (Class B) tested and recognised: This applies to ConHasp GRANIT™ 215/100 + padlocks 37/55HB100, 37RK/70HB100 and 83/60HB100-5 (only in conjunction with a profile cylinder of at least VdS Home class)

Operation and use

- Fits the most common transportation and storage containers
- Installation on both old and new containers possible
- Can be secured with existing padlocks (insurer recommendation: GRANIT™ 37RK/70HB100, 37/55HB100 or Rock 83/60HB100-5)
- Can be secured with existing padlocks (Insurer recommendation: Granit padlock)

Variants

- Colour: black
- Sets: Container lock + padlock and without padlock available
- Compatible locks: GRANIT™ (37RK/70HB100, 37/55HB100), Rock (83/80HB100, 83/60HB100-5)
- Rock padlocks: without cylinder (cylinder is available separately)
- Bitting: keyed alike and keyed to differ padlocks available
